

# BIOGRAPHY

## **Robert Pomietto,** Director, Process and Improvement, Center for Systems Management

Mr. Robert J. Pomietto has more than 30 years of experience encompassing all phases of the system development life cycle of large complex systems, from strategic automation planning through implementation and maintenance of business and operational systems on mainframes, minicomputers, networks and PC platforms. He is an expert in systems and software development processes and environments. As an SEI authorized Lead Appraiser and Assessor, Mr. Pomietto has participated and led numerous SEI software capability evaluations (SCE's) and SCAMPI appraisals including maturity levels 4 and 5. He has been actively involved in a number of projects to develop new processes and tools to increase productivity, improve quality and reduce cost for several Fortune 100 Consulting firms. He has worked with small and large organizations in Federal and State Governments in the Civilian and DOD sectors, and Financial and Telecommunications industries. Mr. Pomietto's career spans from directing military, civilian and commercial projects valued at over \$2 billion to managing staff, acting as a Program Manager on a \$50 million dollar EPA contract, to teaching and developing courses at the undergraduate/graduate level, and to consulting opportunities involving architectures and cutting edge technologies.

Mr. Pomietto is also a Software Capability Lead Evaluator (SCE), Intro to CMM and a CMMI instructor. In addition to delivering numerous *Introduction to CMMI* courses, he has developed *Understanding the CMMI* Courses, *Overview of the CMMI for Executives* as well implementing methods for adapting the CMM to small teams, and rapid development environments.
